-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 1 and 2 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. Particularly, applicant claims that "all of the electrode patterns have substantially identical shapes and...areas of all the electrode patterns are substantially identical." However, in the specification, there is no clear explanation of the phrase "substantially identical" that would allow one of ordinary skill in the art to make or use the invention. Therefore, the claims are viewed as not enabled.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Turning to Ha (US 2004/0207593 especially, Ha's disclosure anticipates all aspects of claims 1 and 2, but fails to teach that "***all*** of the electrode patterns...two dimensionally overlap ***all*** of the switch control signal lines". Instead, only ***some***, and not all, of these electrode patterns overlap all of the switch control signal lines. The other prior art of record fails to teach this feature.
